STORY MATS

Alan and his mother and father arrived at the zoo at 3:00 P.M. when the whale show started. They paid \$10 each to get in the zoo. They each paid another \$10 to see the whale show. They saw all 36 monkeys in the monkey exhibit. The tropical bird display only had storks and parrots, but they saw all 19 storks and some of the parrots in the display. There were 32 species of mammals in the mammal area. After touring the reptile section, they left 4 hours after arriving at the zoo.

How much in all did Alan's family spend on the entrance costs to the zoo and whale show?
