

As a proud subscriber to Target the Question Plus you have access to **BOTH** Target the Question Virtual Board and Target the Question Plus 1:1. So, how do you get started?

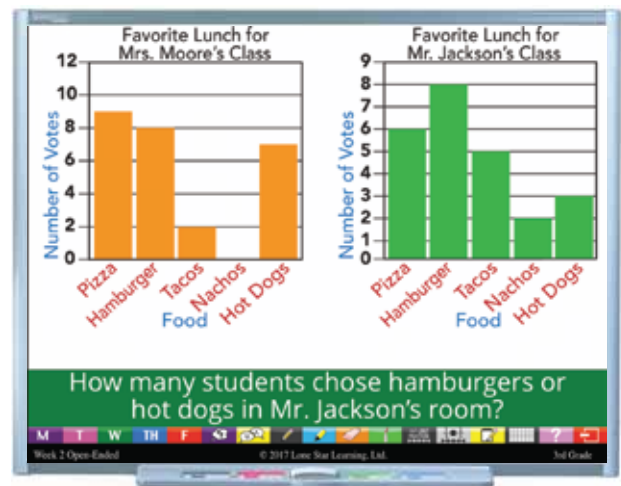

As you start a new year with Target the Question Plus, we recommend you begin with whole group sessions using the Virtual Board included with your license. This will allow you and your students to become familiar with the program before you start assigning content out to your students to be completed on their student devices. After doing this for 3-4 weeks, you and your students will have laid the foundation for successful use of Target the Question Plus.

Weeks 1-4

Weeks 1-4 (and for small group intervention throughout the year)

Introduce your students to Target the Question by completing the daily work whole group using the Virtual Board. You will project the Virtual Board for students and work through the problems as a class to create a familiarity with the program. Students will complete the work on their printed student think sheets as you model from the board.

Weeks 5- EOY

Weeks 5-End of the Year

Assign Target the Question Plus content out to your students using Google Classroom, Schoology, Canvas, etc. Students will complete the work and submit it back to you. You can then view their work and leave feedback for them to encourage growth. You can continue to project the Virtual Board for classroom instruction.
